

About ZRF...

Zagreb Radio Fest (ZRF) is a traditional event organized every year in September by Zagreb Amateur Radio Society. It is a professional fair that brings together the RADIO-HAMS of Europe and other devotees of electronics and informatics with the purpose of enabling the exchange of professional information, promoting the activities of the associations of amateur radio operators as well as spreading general knowledge related to technical culture. Zagreb Radio Fest has been traditionally organized at the grounds of the Sports and Recreational Centre Jarun in Zagreb.

Dear radio hams and electrical technology enthusiasts!

Carrying on the tradition, I am greatly pleased to inform you that ZAGREB RADIO FEST will be held this year as well, on 08 September 2007 at Lake Jarun. Using past experience in the organization of ZRF as well as the suggestions of many of you, we will try to upgrade the organization and realization of this year's ZRF. Not only will we further try to create an interesting and enjoyable atmosphere for this gathering, but we will also expand the programme of the ZRF. Owing to the great interest of the domestic and foreign exhibitors we decided to provide additional space for the ZRF, so this year it will be held in an open area located in front of the Technical house, but it will also include a closed space. All these arrangements will contribute to a higher level of the quality and comfort of the ZRF. This year's ZRF will host national associations of radio hams from the neighbouring countries, exhibitors - domestic and foreign companies, and we will also provide the space for the sale of used equipment (flea market). As we have previously done, this year we will as well prepare several interesting meetings and lectures for all interested participants. If you are in some way connected to or know of a company that is related to our field of activity and if you are interested in an active participation in this year's ZRF please enter your general information into our registration form and send it to zrf@email.t-com.hr.

We look forward to meeting you at your and our ZRF !

Respectfully yours,

Boris Vrbanović, 9A2JY
ZRF Director
